"IT'S A GREAT RESPONSIBILITY TO CREATE CHAIRS THAT WILL BE USED FOR GENERATIONS WITHOUT HARMING THE ENVIRONMENT."

ABOUT US

A family owned business since 1994, Kasto chairs has now over three decades of experience in producing wooden chairs. We know chairs best and our diligence has no limits.

In the past 10 years we have invested in both production facilities and top-notch equipment. Currently, we produce our chairs with last generation CNC machines making our factory the most modern factory in Bulgaria.

Moreover, our production processes are certified in accordance with 9001:2015 commitment.

showing our consistency and

With a 28345 m2 production facilities and more than 70 devoted employees, Kasto chairs manufactures between 10 000 to 15 000 chairs every month. In the past 10 years the investment exceeds 10 mil EUR in process automation and the renovation continues again today.

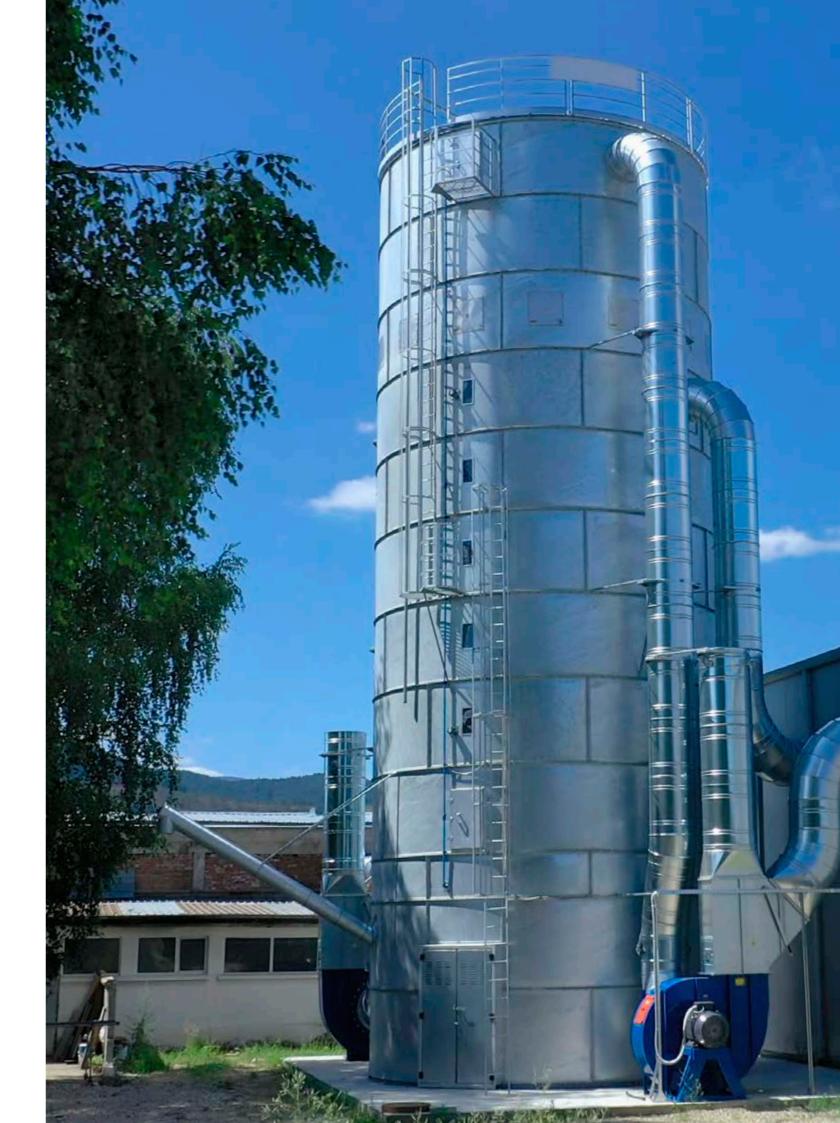

GREENING Our investing activity is concentrated on making our chairs "greener" by using only modern equipment in all stages of the production process starting CHAIRS

with the drying process and finishing with the lacquering department. All materials we use are sustainable and recyclable, harming the environment in the least way possible. Thanks to our investment activity, nowadays we utilize 100% of our wood waste. Our carbon footprint is negative during the spring and summer months thanks to our 300 kWh solar plant located on the roof of the factory. Moreover, we plan to invest in extension of the current solar plant and increase it's capacity to 500 kWh making our company carbon negative throughout the whole year. Currently, we save 300 000 kg of CO2 emissions annually.

Located at the foot of the Rhodope
Mountain we are daily reminded of our
tremendous responsibility for our nature
and the people living around us.
Therefore, we supply timber locally.

The wood we use comes only from

FSC certified and replaceable forests.

Our company and our suppliers are following all rules of the European timber regulations: **EUTR and European deforestation**

regulation EUDR, and we can trace back the wood we use to its roots.

PHILOSOPHY

Finally, we are audited every year from,

SEDEX according to SMETA 4-pillar

method, meeting all requirements showing our engagements to our society and the environment.

OUR

OUR PRODUCTS

Kasto chairs exceeds all your expectations. From modern, classic and all the way to traditional, our chairs are standing out with their quality and comfortability. Most of our products are mechanically tested according to standard EN 16139:2014-03 - Furniture - Strength, durability and safety,

showing that our products are suitable for contract use.
